

# BAR FABRICATION SERVICES

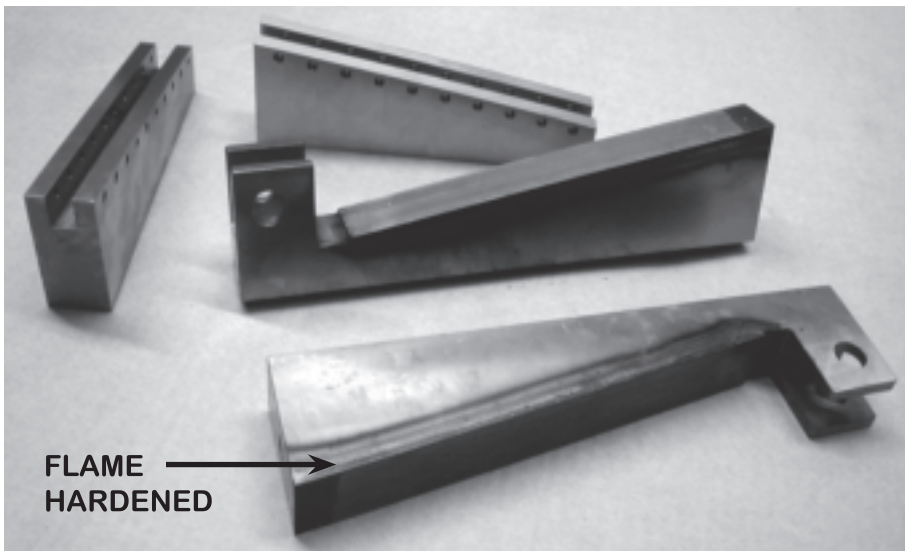

**North American Steel Company** frequently provides complete O.E.M. type replacement products, that are ready for immediate installation, to minimize downtime and increase productivity. Our capabilities include the latest version of AUTOCAD and Blue Print services. For details, please contact your local area sales representative, or call our office.

We are pleased to review your sketches, prints, worn or new parts, and offer our technical opinion at no charge. In doing so this company assumes no liability nor implies any guarantee for this complimentary service. Our services are limited to working with various materials that are featured in this technical data book and have been provided by us. We adhere to all quality practices within our ISO guidelines and reserve the right to decline quotation or fabrication at our discretion.
